Introduction

We have our own unique identity of being fun, innovative, modern, witty and relatable. Having a consistent look and voice across all our site assets helps strengthen our brand identity and makes us more top-of-mind to members.

The Design Style Guide showcases our templatized digital assets designed to help designers and outside agencies stay within our brand guidelines so we can create a cohesive look and feel across our site.

To keep with our identity, copy should be short and sweet with one primary message. Design should follow the PSD templates and be in-line with the main brand guidelines. Following these guidelines will give you the best chance of having your asset approved as is.

Visit the SAM'S CLUB BRAND CENTER to download the main brand guidelines.
Brand Colors

Our brand palette has been updated to communicate that we are a modern, energetic and bold company. Our primary and secondary palettes are fresh and reflect our “bold bestie” personality.

Supporting Colors

Use supporting colors with intention. There needs to be a strong design rationale and/or a visual correlation with the hero image when incorporating a supporting color. Select tones that are complementary to our brand palette and use bright jewel tones when choosing supporting colors.
Contrast Checker

All text must pass WCAG AA standards with the WebAIM Color Contrast Checker:
webaim.org/resources/contrastchecker/

Normal Text
This would include preheaders, subheads, CTAs and any other text below 18.66px.

Large Text
This applies to headlines or titles at least 18.66px when the text is bold and 24px when the text is regular.

Graphical Objects and User Interface Components
For button-style CTAs where the text is encapsulated in a rectangle (mobile, tablet, email, etc...), the text needs to pass against the background color, as well as the button color against the background it sits on.

Normal Text

| WCAG AA: | Pass | The five boxing wizards jump quickly. |
| WCAG AAA: | Pass | |

Large Text

| WCAG AA: | Pass | The five boxing wizards jump quickly. |
| WCAG AAA: | Pass | |

Graphical Objects and User Interface Components

| WCAG AA: | Pass | |
| Text Input: | |
In order to comply with ADA standards, please use these color combinations for text and background in all digital assets.

**Contrast Checker**
webaim.org/resources/contrastchecker/

**ADA Compliant Combinations**

**SAM’S BLUE BACKGROUND**
- White Text

**TROPICAL BLUE BACKGROUND**
- Black Text

**SKY BLUE BACKGROUND**
- SAM’S BLUE Text
- MIDNIGHT BLUE Text
- BLACK Text

**SAPPHIRE BLUE BACKGROUND**
- White Text
- SKY BLUE Text
- LIGHT GREY Text

**MIDNIGHT BLUE BACKGROUND**
- White Text
- SKY BLUE Text
- LIGHT GREY Text
**Contrast Checker**

Both CTA text and arrow need to pass the contrast checker.

[webaim.org/resources/contrastchecker/](webaim.org/resources/contrastchecker/)

---

**CTA Guidance**

Both arrow color against button color and button against background must pass large text specifications.

---

**Large Text**

WCAG AA: ✅ Pass

---

Both CTA text against button color and button against background color must pass large text specifications.
Placing text on an image

When placing text on an image, or any background that is not a solid color, sample the darkest color that touches the text and enter that as the background color in the contrast checker. If the text is lighter than the background, the lightest area that touches the text should be sampled and used as the background color.

The darkest area of the background that touches the text should be sampled and entered in as background color.

When using text lighter than the background, the lightest area that touches the text should be sampled and entered in as background color.
**Gradients**

Subtle gradient to add depth and visual interest.

**NOTE**: Use gradients sparingly on badges and graphic-only assets.

Can apply gradient to seasonal/accents colors.
Patterns
Clean, simple patterns used in an unexpected way, to help elevate the design while adding a hint of playfulness.

Best Practices
- Use of patterns should never be overpowering.
- Patterns are only used as enhancement - HL and photography should always be the HERO
- Find unexpected, delightful ways to incorporate patterns.
Pattern Examples
Clean, simple patterns used in an unexpected way, to help elevate the design while adding a hint of playfulness.

Best Practices
- Use of patterns should never be overpowering.
- Patterns are only used as enhancement - HL and photography should always be the HERO
- Find unexpected, delightful ways to incorporate patterns.

Brand Font
Gibson is our primary brand font. We use four different weights to distinguish visual hierarchy.

Gibson

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
01234567890 (.,;:'"$#@!&*)

Primary Fonts

Gibson Semibold
Gibson Regular

Secondary Fonts

Gibson Bold
Gibson Book
Type Treatment

Overall width, alignment, and size of H1 headlines may depend on placement in relation to product images and/or photographs. Resizing is up to the discretion of the designer, but must maintain proportions and visual hierarchy between all heads.

Choose one H2 Sub Headline option to pair with the Main Headline based on your layout. Both treatments should not be used in the same design.

Body copy size should remain consistent across all module sections within the design.
**Type Treatment**

NOTE: Refer to site assets template for onsite type specs.
**Typography**

**Type Spacing**

**Kerning**

25% Off
25% Off

Manually kern out letters that run into each other.

**Leading and Copy Spacing**

Always create enough space between headline and subcopy to allow for visual breaks. Keep spacing consistent throughout the design layout.

Keep subcopy leading at +2pt and consistent throughout the design layout.
Type Treatment Examples

Print

Bring back the sit-down meal.

EVERYTHING YOU NEED INCLUDING THE KITCHEN SINK.

GOOD AT PLANKS?

Baskets for every bunny.

Digital

Esther’s April 12
Your Sunday best.

Tech it outside.

Chill mode, activated.

Everyone’s invited.

PRETTY AND ALISON PRETTY Tidbits
Stock Photography

Use stock photography when there isn’t a better option from the in-house lifestyle photography we’ve shot.

Avoid photography that is staged and/or posed.

Avoid anything too cutesy.

Use candid, authentic-feeling photography when there are people in the shot.

If you need photography of a home interior, try to keep the decor neutral and not too modern or identifiable. We don’t want it to be too flashy and result in people thinking we sell what’s in the photo.

When looking for food photography, keep it straightforward.
Badges

Use badge treatments for price savings promotional messaging or “Expect Something Special”.

- **25% OFF**
- **FREE SHIPPING**
- **expect something special**

**GEOMETRIC GRADIENT**

![Geometric Gradient Colors]

**BASIC GRADIENT**

![Basic Gradient Colors]
Badges
Use badge treatments for price savings promotional messaging or to call out other important information.

DOWNLOAD WORKING FILE HERE
**Callout Treatments**

Use these to call out specific product features or product names or to highlight the quality or value story.

**Body copy**: Gibson Book, size 9pt, leading 11pt, kerning metrics, tracking 0

**NOTE**: All versions are interchangeable based on design layout.

EXAMPLES
Callout Treatment

Why we love this w/Headshot:

Lead-in copy: Gibson Medium, 12pt (all caps), 0.05” space after

Body copy: Gibson italic, size 10pt, leading 12pt, kerning metrics, tracking 0

Job title copy: Gibson Regular, 8pt

NOTE: All versions are Interchangeable based on design layout.
Callout Treatment

This should be used when featuring a customer review on a specific product, usually in an email.

**Headline:**
Gibson Medium, 9pt (all cap), 0.05” space after,

**Body copy:** Gibson italic, size 8pt, leading 10pt, kerning metrics, tracking 0

**User name copy:** Gibson Regular, 6pt
Brand Voice & Tone

All Sam’s Club content should be in the Bold Bestie voice.

Your Bold Bestie listens and truly hears what you need most—while making you smile. And she does so without judgment, ready to take on anything with you (or for you).

A Bold Bestie is:
- She gets it and keeps it real with you, from little moments to big challenges.
- She knows just what you need to make you feel better and taken care of.
- She takes something off your shoulders and makes everything seem a little easier.
- She brings you something you need or love (but won’t do for yourself), like a slice of cheesecake.
- She does it all with levity and wit (and a big heart).

Copy should:
- Exercise sensitivity and caution in language, message and story choice, without avoiding, belittling or pandering.
- Opt for a friendly, calm, supportive tone vs. an overly excited or celebratory one.

POV headlines should be 1-2 lines (MAX 20 characters). Subheads should ideally be one line (MAX 40 characters).

Banner headlines should be 1 line (MAX 32 characters). Subheads should also be 1 line (MAX 75 characters).
Homepage
Homepage Placement Overview

1. ROS banner
2. Homepage POV
3. Social Module
4. Seasonal Hub
5. Featured Service
6. Visual Nav
7. Product Marketing Module (location may move up or depending on if Social mod is live)
8. Global Nav/"gNav" - located in “Shop by Department” drop down nav in header
ROS (Run of Site) banner

This is an HTML text banner that runs above the POV and shows up on every page.

Be mindful of ADA compliance when choosing text and background colors.

Height is fixed.

This banner is always HTML coded text.
Text can only be one color and one weight. Only the CTA text is bolded.
Background can be any color as long as color + text color is ADA compliant.

**COPY - CHARACTER COUNT**
MAXIMUM 80

FYI: CTA must be at the end of the copy line due to technical limitations
Homepage POVs

This template contains all sizes required for homepage POVs. Once layouts are complete, follow instructions in the PSD to export the individual assets. Callouts apply to all sizes.

On tablet and mobile versions, CTA button must pass the contrast checker against the background and text must pass against the button color.

DOWNLOAD TEMPLATES HERE

Contact brandguideteam@samsclub.com for access to any templates found in this guide.
Desktop Homepage POVs

Ideally, if there’s a way to leverage a full bleed lifestyle image, that should always be the first option when creating a homepage POV.

If a lifestyle image is too busy, an overlay can be used to make text ADA compliant.
Tablet

Homepage POVs

Same guidelines apply as desktop.

CTA button must pass the contrast checker against the background and text must pass against the button color.
**Mobile Homepage POVs**

Same guidelines apply as desktop.

CTA button must pass the contrast checker against the background and text must pass against the button color.

Social Module

This template contains all sizes required for the Social Module. Once layouts are complete, follow instructions in the PSD to export the individual assets. Callouts apply to all sizes.

LINK TO TEMPLATE LOCATED ON PAGE 28
Sebastian Hub

IMPORTANT:
Regardless of which layout style you use, follow these dimensions and guidelines.

Max width for entire hub is 1140px
Height is variable.

For 3-up modules:
Max width for each section is 380px,
gutter included, see note on the right.

For 2-up modules:
Max width for each section is 570px,
gutter included, see note on the right.

IMPORTANT:
You also need to take into account gutters (aka the spacing between modules).
Standard gutters in web design should be of multiples of four (4px, 8px, 12px, 16px, etc.)
that you can determine.

Note: When the tile max width says it’s 380px, that needs to include the gutter.
So consider that when you’re determining the width of each of your modules.

Service Modules

These banners live 2-up. One is always OMP and is designed by the OMP team. The other is always Member’s Mark™ and is done by our team.

Ideally, if there’s a way to leverage a full bleed lifestyle image, that should always be the first option when creating a category POV.

When a full bleed lifestyle is not an option, color blocking can be used to fill space and add color. If there’s a lifestyle image available, use that over product silhouettes. Try to stick to vertical or 45 degree angled shapes.

CTA button must pass the contrast checker against the background and text must pass against the button color.

Content Module

Height of banner/module is flexible.

Can also be one long banner or divided up into 2 or 3 sections.

Fully flexible, height, number of stories.
**Content Module Examples**

**3-UP**

Crowd-pleasing apps in a snap.

- **Go ahead, eat with your hands.**
  - Start with thinned biscuits, top with pimiento and garlic, spoon in your fill of choice and bake until golden brown.

- **Team Ranch or Team Blue Cheese?**
  - From freezer to oven to table in minutes. Just heat, toss with hot sauce and serve with your crackers.

- **It’s green, so it’s healthy, right?**
  - Yoplait and very Paramount’s Mark II. Creamy, smooth is free of artificial anything. Sprinkled bag at chips for an instant crowd pleaser.

**2-UP**

Your kitchen counters need some love.

- **Cooking, but quicker.**
  - Small kitchen appliances that are a big help.

- **Your new best friends.**
  - Cookware to turn any meal into a masterpiece.

**CONTENT BANNER**

- New year, fresh start, you. World, watch out...

- Shop Now
Content Module - Mobile

Height of each module is variable based on contents.

Mobile width: 640

EXAMPLES

CONTENT BANNER
**Visual Nav**

These visual navigation sections live on category pages as a way to elevate more specific categories within that division.

**LINK TO TEMPLATE LOCATED ON PAGE 28**

---

**IMPORTANT:**

The light gray squares shown here are just to show the 400x400 dimension but actual images should be against a white background. See next page for an example.

If using a lifestyle image you can use a 400x400 square OR circle, just make sure everything is consistent.

General rule of thumb, if it goes to two rows, circle crops tend to look better en masse than rows of square image crops.

Custom Landing Pages
Custom Landing Page

Modular Category landing page
Custom Landing Page

These pages can be designed however best fits the story you need to tell. Some may have vendor supplied images and specific product silos to use.

Some may be a more general story where stock photography and product images are all you have to utilize.

Work with your copywriter (and your AD if needed) to come up with a creative solve and determine how best to break up the information and tell the story.

In MOST cases, you will need to design a mobile version as well. Keep that in mind as you design the desktop version and work through how the design will need to adapt.
Custom Landing Page
Custom Landing Page

(This page did not require a mobile version.)
Push Notifications
Push Notifications

**Android - Landscape:** 1039 x 519

**iPhone - Landscape:** 1039 x 694

**iPhone - Square:** 1039 x 1039

These can be image only or image and text.

Text should be minimal, bearing in mind how small the notification is on the phone screen.

Ideally, the image and copy should be developed together to ensure they complement each other, especially for Android when only the title shows up with the image (no subhead/description).
Push Notifications

These can be image only or image and text.
